

- Khosrow...I would add “hispanics” to this since the TB rate is high among this group and the group is becoming more prevalent in the U.S., but data is only from 1999-on.
- Dramatic rates of decline in TB continue and have been most dramatic among black males.
- The disparity in occurrence of TB among blacks remains large (Y2001 BM:WM Relative Risk = 8.4, Y2001 BF:WF Relative Risk = 8.8).
